

CASE STUDY

Future of Gas

FTI Consulting conducted a study for the Belgian gas pipeline operator who wanted to conduct a cost-benefit analysis of different outlooks of gas penetration in the Belgian energy mix until 2040. The study was influential in the Belgian government's gas policy decisions.

SITUATION

The Belgian gas pipeline operator wanted to conduct a cost-benefit analysis of different outlooks of gas penetration in the Belgian energy mix until 2040.

OUR ROLE

FTI Consulting assessed the costs of different technological options for gas compared to other energies, for energy use in heating and cooling, transportation, industrial processes or biomass valorisation. FTI Consulting evaluated the impact of different gas usage outlook in the Belgian energy mix, taking into account the interactions with power markets.

OUR IMPACT

The study was influential in the Belgian government's gas policy decisions. It is available here: <https://www.fticonsulting.com/fti-intelligence/energy/research/eu-power-gas-markets/study-on-the-role-of-gas-in-belgiums-future-energy-system>.
